

Tracking the Global Expansion: Economic Indicators - Italy

Data last updated 2012-01-23.

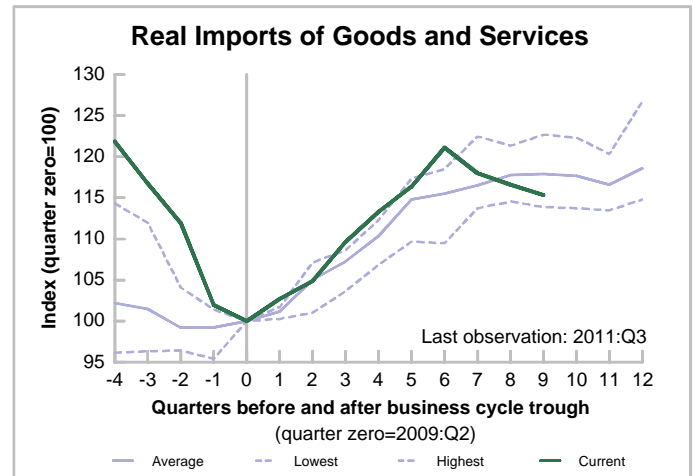

NOTE: The charts plot three main economic indicators similar to those tracked by the [NBER](#) dating committee for the U.S.; each series is indexed to 100 at the business cycle trough. The green line indicates the [current expansion](#). The solid blue line indicates the average of the [previous six expansions](#), starting with the October 1985 trough. The two dashed lines report the highest and lowest values recorded across these previous expansions.

NOTES and SOURCES

ITALY

The charts plot four main economic indicators, similar to those tracked by the [NBER](#) dating committee for the U.S., and Real Gross Domestic Product and its major components; each series is indexed to 100 at the business cycle turning point. The red (green) line indicates the [current](#) recession (expansion). The solid blue (gray) line indicates the average of previous recessions (expansions). The two dashed lines report the highest and lowest values recorded across these previous recessions (expansions).

The data and recession dates used in the international charts are from the Organisation for Economic Co-Operation and Development (OECD).

BUSINESS CYCLE TURNING POINTS:

Peak Dates

- September 1984
- November 1989
- October 1995
- November 1997
- December 2000
- March 2008

Trough Dates

- October 1985
- September 1993
- November 1996
- April 1999
- February 2005
- May 2009
