

# Teaching with Data: FRED Interactives Preview

Diego Mendez-Carbajo

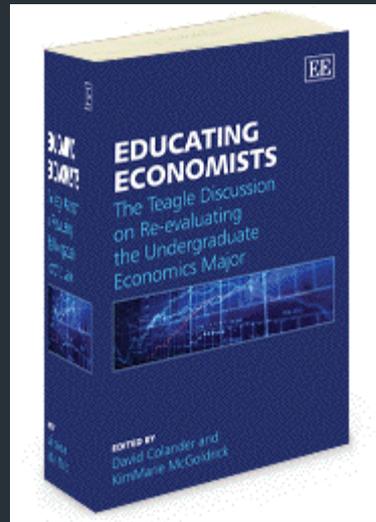

*Illinois Wesleyan University, Economics Department*

October 2016

# Introduction

# Student Learning Goals

*“Thinking like an economist”*

*Siegfried, J., et al. (1991). The Status and Prospects of the Economics Major. Journal of Economic Education Vol. 251, No. 3, pp. 197-224*

# Traditional Pedagogy and Data

## Theory first; Data illustrates

*Step #1: Lecturing on abstract concepts.*

*Step #2: Plotting data as illustrations.*

## Example

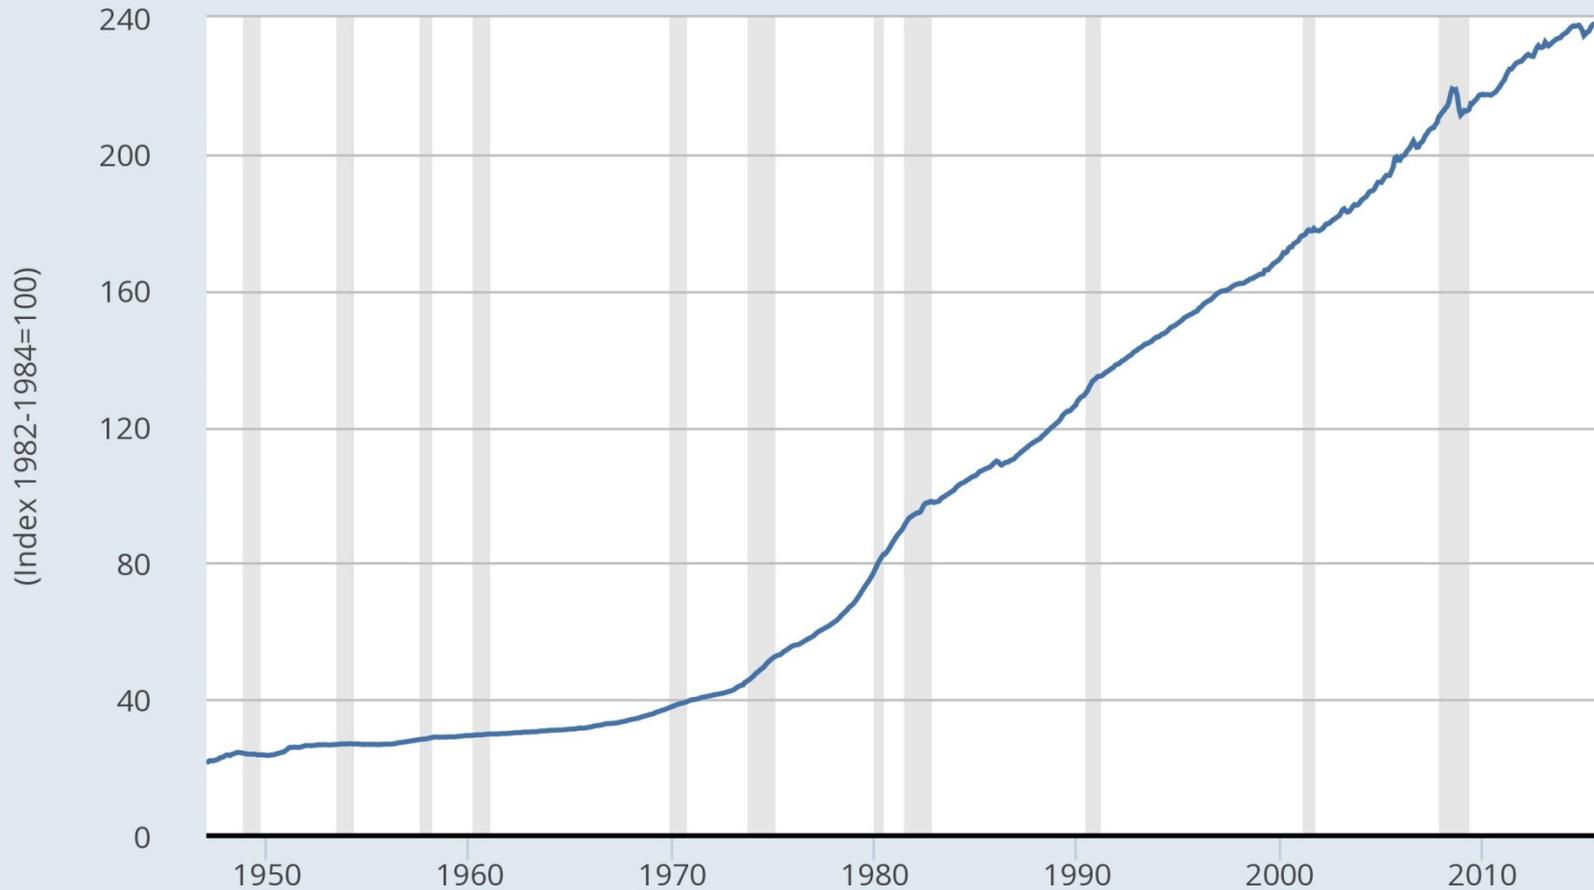

*“Inflation is the percentage growth of the CPI. The CPI is computed by first identifying the basket...”*

*“This is how the CPI or the inflation rate look like”*

# The Consumer Price Index

— Consumer Price Index for All Urban Consumers: All Items

Source: US. Bureau of Labor Statistics  
[research.stlouisfed.org](http://research.stlouisfed.org)

# A World Awash in Data

The screenshot displays the IMF Cross-Dataset Query Builder interface. The top navigation bar includes links for IMF.org, eLIBRARY, BOOKSTORE, and IMF DATA, along with a Help link. The main interface is divided into several sections:

- Filters:** On the left, there are four filter categories: Country (1 of 347 items selected), Concept (0 of 2002 items selected), Data Source (1 of 13 items selected), and Time (1990 - 2013 (Annual)). Each filter has a 'Reset' button.
- Actions:** Below the filters are two green buttons: 'Download' and 'View data →'.
- Available items:** The main area shows a list of available items under the heading 'Concept'. A 'Quick filter' box is present above the list. The list includes various economic indicators such as 'National Accounts', 'Expenditures', 'Gross Domestic Product, Nominal', and 'GDP-GNP Relation'. Each item has a checkbox and a plus icon to expand the list.
- Selected items:** A tab for 'Selected items' is visible at the top right of the main area.
- Get direct link:** A link to 'Get direct link' is located at the top right of the main area.

# Traditional Work with Data

The screenshot displays the EViews software interface. The main window title is "EViews". The menu bar includes "File", "Edit", "Object", "View", "Proc", "Quick", "Options", "Add-ins", "Window", and "Help". The workfile title is "Workfile: SENIOR SEM JDOE - (g:\my document...". The toolbar contains buttons for "View", "Proc", "Object", "Print", "Save", "Details+/-", "Show", "Fetch", "Store", "Delete", "Gener", and "Sample". The status bar shows "Range: 1/03/2000 12/27/2010 -- 574 obs" and "Sample: 1/03/2000 12/27/2010 -- 574 obs". The main area lists various objects, each with a checkbox and a small icon:

<input checked="" type="checkbox"/> adj__close	<input checked="" type="checkbox"/> phl_gr
<input checked="" type="checkbox"/> c	<input checked="" type="checkbox"/> phl_vol
<input checked="" type="checkbox"/> close	<input checked="" type="checkbox"/> poc
<input checked="" type="checkbox"/> d2	<input checked="" type="checkbox"/> poc_gr
<input checked="" type="checkbox"/> direc	<input checked="" type="checkbox"/> poc_vol
<input checked="" type="checkbox"/> dlog_close	<input checked="" type="checkbox"/> resid
<input checked="" type="checkbox"/> dlog_low	<input checked="" type="checkbox"/> t
<input checked="" type="checkbox"/> dlog_phl	<input checked="" type="checkbox"/> td2
<input checked="" type="checkbox"/> dlog_poc	<input checked="" type="checkbox"/> volume
<input checked="" type="checkbox"/> dlog_volume	<input checked="" type="checkbox"/> volume_g01
<input checked="" type="checkbox"/> dprice	<input checked="" type="checkbox"/> volume_g02
<input checked="" type="checkbox"/> dum_2001	<input checked="" type="checkbox"/> volume_g03
<input checked="" type="checkbox"/> dum_2008	<input checked="" type="checkbox"/> volume_g04
<input checked="" type="checkbox"/> dum_2010	<input checked="" type="checkbox"/> volume_gr
<input checked="" type="checkbox"/> high	<input checked="" type="checkbox"/> volume_movav12
<input checked="" type="checkbox"/> log_close	<input checked="" type="checkbox"/> volume_t01
<input checked="" type="checkbox"/> log_low	<input checked="" type="checkbox"/> volume_t02
<input checked="" type="checkbox"/> log_phl	<input checked="" type="checkbox"/> volume_t03
<input checked="" type="checkbox"/> log_poc	<input checked="" type="checkbox"/> volume_trend
<input checked="" type="checkbox"/> log_volume	<input checked="" type="checkbox"/> volume_trends
<input checked="" type="checkbox"/> low	
<input checked="" type="checkbox"/> open	
<input checked="" type="checkbox"/> phl	

At the bottom, there are navigation arrows and tabs labeled "Untitled" and "New Page".

# Weak Output

## Data Description

	Unemployment	Interest rates	Growth Rate	Exp/GDP	FDI/GDP
Estonia	33.219(.957)	6.710(.473)	-2.830(.125)	5.424(.377)	.465(-.017)
Latvia	-1.765(.041)	.310(-.019)	-2.559(.102)	16.891(.858)	-.371(-.018)
Lithuania	23.355(.917)	9.518(.646)	-1.845(.048)	2.776(.123)	1.367(.017)

### Model 2: Top 5% income share:

Variable	Unstandardized Coefficient	Significance Level
Lagged top 5% income share	.842	.000***
Top marginal tax rate	-.013	.047**
GDP Growth	-.006	.868
GDP (2000\$)	2.455E-013	.074*
Export + Imports	.018	.105
Private credit	.002	.535
R square: .96		
Level of significance: *** 1% , ** 5% , * 10%		

Data Analysis

**Objective & Difficulty: TESTING THE CLICKERS / Low**

What statement best describes your familiarity with FRED?

- |          |                               |
|----------|-------------------------------|
| <b>A</b> | I have heard of FRED before   |
| <b>B</b> | I have seen FRED before       |
| <b>C</b> | I have occasionally used FRED |
| <b>D</b> | I frequently use FRED         |
| <b>E</b> | Other                         |

# Alternative Approach

# Teaching and Learning with Data

## Data leads; Theory builds on visuals

*Step #1:* Data plots introduce and illustrate concepts.

*Step #2:* Data-focused discussions lead lecturing on abstract concepts.

### Example

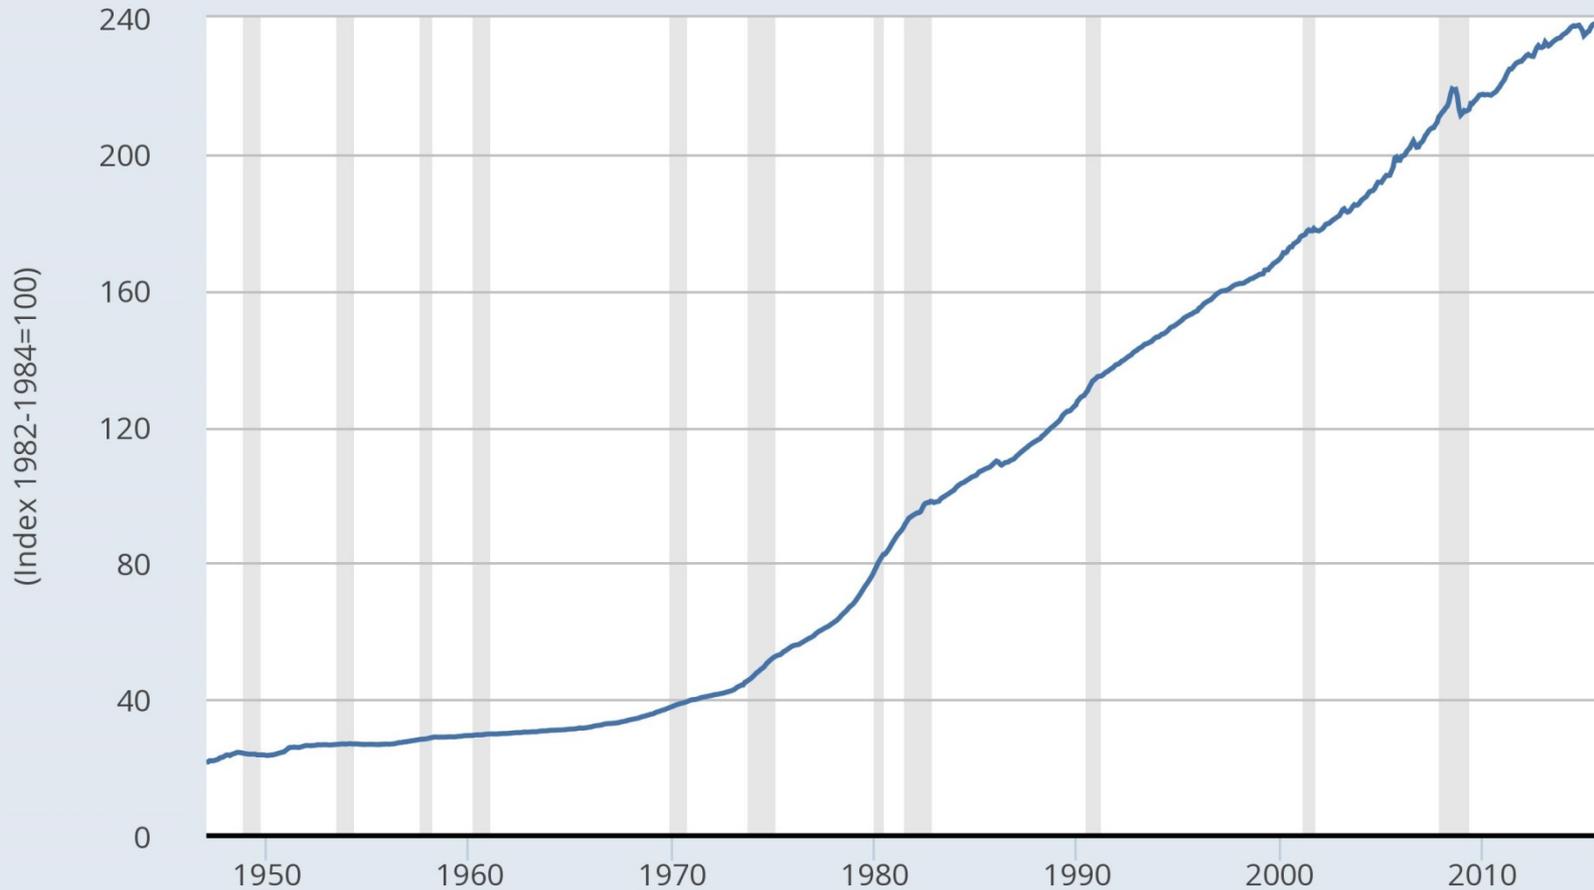

*“The CPI measures the cost of living. Is its plot a flat or an upward sloping line?”*

*“What does it mean, in terms of inflation, when the slope of the CPI plot becomes steeper?”*

# The Consumer Price Index

— Consumer Price Index for All Urban Consumers: All Items

Source: US. Bureau of Labor Statistics  
[research.stlouisfed.org](http://research.stlouisfed.org)

# Theoretical Foundation

- Bloom's (1956) educational taxonomy
- Tufte (2001) reasoning through graphics
- Mendez-Carbajo (2015) and (2016) interplay among numeracy, information literacy, and economic analysis

---

## ECONOMIC INSTRUCTION

---

### Visualizing Data and the Online FRED Database

Diego Méndez-Carbajo

5

The author discusses a pedagogical strategy based on data visualization and analysis in the teaching of intermediate macroeconomics and financial economics. In these short projects, students collect and manipulate economic data from the online Federal Reserve Economic Database (FRED) in order to illustrate theoretical relationships discussed in class. All the data collection and manipulation tasks are conducted through the FRED Web site. The author argues that as students locate and effectively use the quantitative information that they need to evaluate abstract concepts, they are in effect developing the connection between theories and empirical evidence that underpins the discipline of economics.

10

**Keywords:** *data analysis, data manipulation, financial economics, intermediate macroeconomics*

**JEL codes:** *A22, C82, G12, G14, G15*

15 As Simkins and Maier (2009) convincingly argued in their description of pedagogical strategies to improve student learning in the economics major, Bloom's higher-order cognitive processes (Bloom 1956) and Siegfried and colleagues (1991) "thinking like an economist" learning goals are best achieved through learning that encourages students to "analyze trends and correlations in economic data, apply economic theory to real-world problems, and evaluate economic policies"

20 (85).<sup>1</sup> The challenge, then, lies in designing course assignments that help students develop the intellectual proficiencies involved in "doing economics." I argue that the Web-based interface of the FRED database is an excellent resource for relating economic concepts and theories to data. The data-visualization and manipulation capabilities of the FRED Web site are significant pedagogical resources because as Tufte (2001, 9) put it, "at their best, graphics are instruments

25 for reasoning about quantitative information."

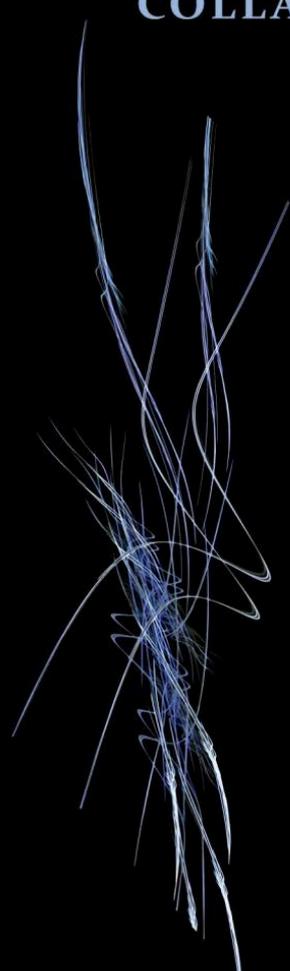

Identifying with Velenchik's (1995) description of the "limitations of theory teaching" through classroom examples, I also find them "often abstracted from context" (31). When introducing

Hands-On Example

# Comparative Advantage

# Setup – Theoretical Concept

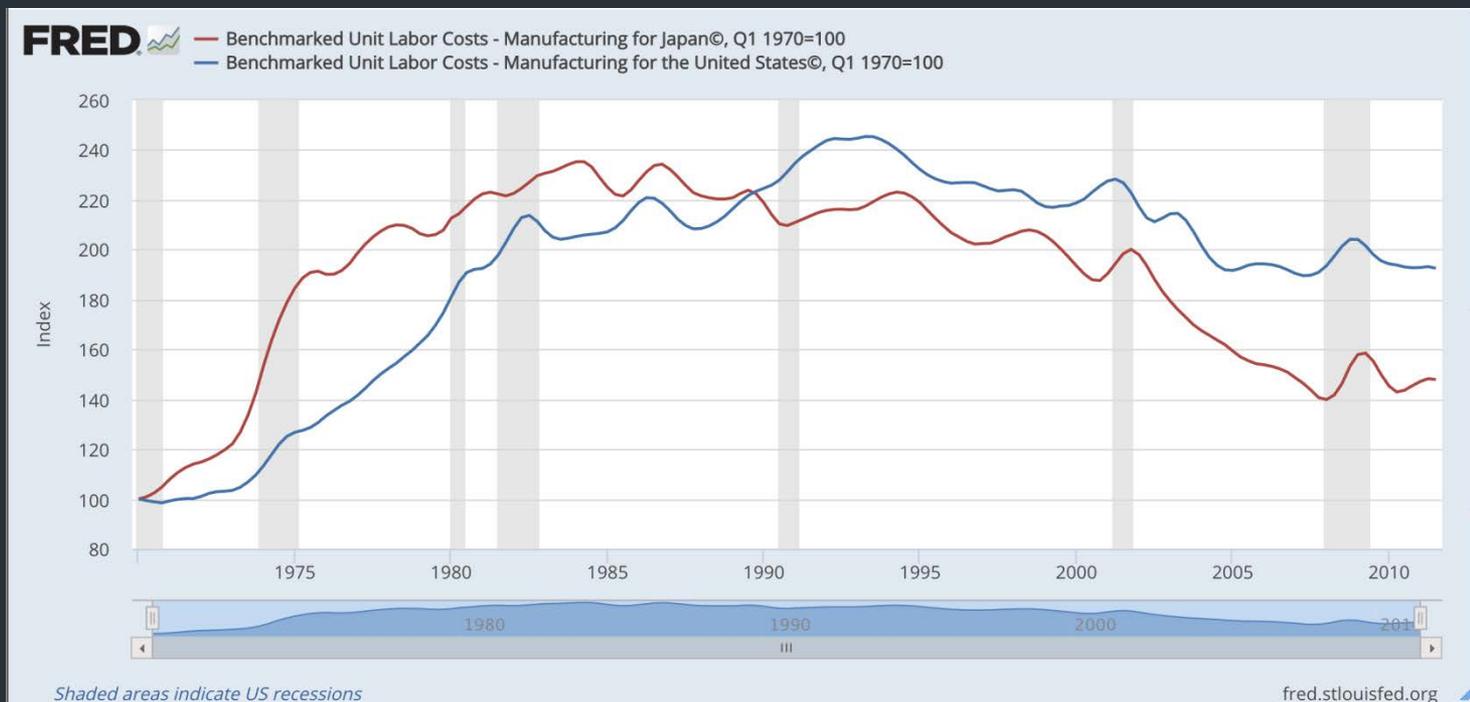

- Absolute and Comparative Advantage
  - The cost of labor affects the price of manufactured goods.
  - A comparison of manufacturing labor costs across countries quantifies the comparative advantage of the United States.

# Setup – FRED Graph

- Direct your browser to:

<https://fred.stlouisfed.org/graph/?g=7yUI>

**Objective & Difficulty: INFORMATION LITERACY / Low**

What organization computes the Benchmarked Unit Labor Costs (Manufacturing) for the United States and Japan?

- |          |   |
|----------|---|
| <b>A</b> | (FRED) Federal Reserve Economic Database                      |
| <b>B</b> | United States Department of Commerce                          |
| <b>C</b> | Board of Governors of the Federal Reserve System              |
| <b>D</b> | Organization for Economic Co-operation and Development (OECD) |

**Objective & Difficulty: INFORMATION LITERACY / Low**

What is the highest frequency of computation of the Benchmarked Unit Labor Costs (Manufacturing) for the United States and Japan?

**A** Monthly

**B** Quarterly

**C** Semi-annual

**D** Annual

## Objective & Difficulty: NUMERACY / Low

In 1970 (the base period in this graph), what is the value of the manufacturing unit labor costs in the United States and in Japan?

**A** 0.5168

**B** 217.4

**C** 193.2

**D** 100

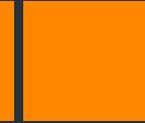

**Objective & Difficulty: NUMERACY / Medium**

Where did unit labor costs grow faster between 1970 and 1984?

**A** In the United States

**B** In Japan

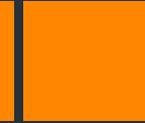

**Objective & Difficulty: ECONOMIC ANALYSIS / Medium**

Between 1970 and 1989, which country had the comparative advantage in manufacturing unit labor costs?

**A** The United States

**B** Japan

**Objective & Difficulty: ECONOMIC ANALYSIS / Medium**

Since 1989, what country has had the comparative advantage in manufacturing unit labor costs?

<b>A</b>	The United States
<b>B</b>	Japan

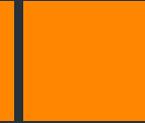

**Objective & Difficulty: NUMERACY AND ECONOMIC ANALYSIS / High**

Since 1994, the United States' comparative disadvantage in manufacturing unit labor costs has \_\_\_\_\_ relative to Japan?

<b>A</b>	Increased
<b>B</b>	Decreased
<b>C</b>	Stayed the same

# Read It!: Focus on Info Lit

**Objective & Difficulty: INFORMATION LITERACY / Low**

What do the grayed bars in the FRED graph represent?

*Hint: Read the text at the bottom left corner of the FRED graph*

- |          |                           |
|----------|---------------------------|
| <b>A</b> | A type of graph           |
| <b>B</b> | A logarithmic (log) scale |
| <b>C</b> | Expansions                |
| <b>D</b> | Recessions                |

**Objective & Difficulty: INFORMATION LITERACY / Low**

What is the suggested citation for the Benchmarked Unit Labor Costs - Manufacturing for the United States©?

*Hint: Read the NOTES below the FRED graph*

- |          |   |
|----------|---|
| <b>A</b> | Organization for Economic Co-operation and Development, Benchmarked Unit Labor Costs - Manufacturing for the United States© [ULQBBU02USQ662N] and Japan© [ULQBBU02JPQ662N]  |
| <b>B</b> | Benchmarked Unit Labor Costs - Manufacturing for the United States© [ULQBBU02USQ662N] and Japan© [ULQBBU02JPQ662N], retrieved from FRED, Federal Reserve Bank of St. Louis [today's date]   |
| <b>C</b> | Organization for Economic Co-operation and Development, Benchmarked Unit Labor Costs - Manufacturing for Japan© [ULQBBU02JPQ662N], retrieved from FRED, Federal Reserve Bank of St. Louis<br><a href="https://research.stlouisfed.org/fred2/series/ULQBBU02JPQ662N">https://research.stlouisfed.org/fred2/series/ULQBBU02JPQ662N</a> [today's date]             |
| <b>D</b> | Organization for Economic Co-operation and Development, Benchmarked Unit Labor Costs - Manufacturing for the United States© [ULQBBU02USQ662N], retrieved from FRED, Federal Reserve Bank of St. Louis<br><a href="https://research.stlouisfed.org/fred2/series/ULQBBU02USQ662N">https://research.stlouisfed.org/fred2/series/ULQBBU02USQ662N</a> [today's date] |

**Objective & Difficulty: INFORMATION LITERACY / High**

Which elements are included in the suggested citation?

*Hint: Read the NOTES below the FRED graph*

<b>A</b>	Data Source; Series Name; Series ID; URL Address; Date Accessed
<b>B</b>	Data Source; Series Name; Series ID; Retrieval Site; URL Address; Date Accessed
<b>C</b>	Data Source; Series Name; Series ID; Series Units; Retrieval Site; URL Address; Date Accessed
<b>D</b>	Data Source; Series Name; Series ID; Retrieval Site; URL Address; Date Updated

**Objective & Difficulty: INFORMATION LITERACY/ Moderate**

What does the © symbol at the end of “Benchmarked Unit Labor Costs - Manufacturing for the United States©” mean?

*Hint: Read the NOTES below the FRED graph*

- |          |  |
|----------|--|
| <b>A</b> | That the name of the series is registered with a national patent office.                 |
| <b>B</b> | That the data contained in the series have been verified by FRED staff.                  |
| <b>C</b> | That the source of the data is a private organization.                                   |
| <b>D</b> | That the organization compiling the data retains certain copyrights on its distribution. |

**Objective & Difficulty: INFORMATION LITERACY / Low**

What is the lowest frequency of computation of the Benchmarked Unit Labor Costs (Manufacturing) for the United States and Japan?

*Hint: Review “Modify frequency” (EDIT GRAPH > EDIT LINES) on the FRED graph*

<b>A</b>	Monthly
<b>B</b>	Quarterly
<b>C</b>	Semi-annual
<b>D</b>	Annual

Hands-On Example

# Nominal and Real Minimum Wage

# Setup – Theoretical Concept

- Nominal and Real Wages

- Nominal wages ( $W$ ) are expressed in current dollars.
- Real wages ( $w$ ) are expressed in constant dollars.
- Real wages are nominal wages adjusted for inflation:  $w = (W / \text{CPI}) * 100$

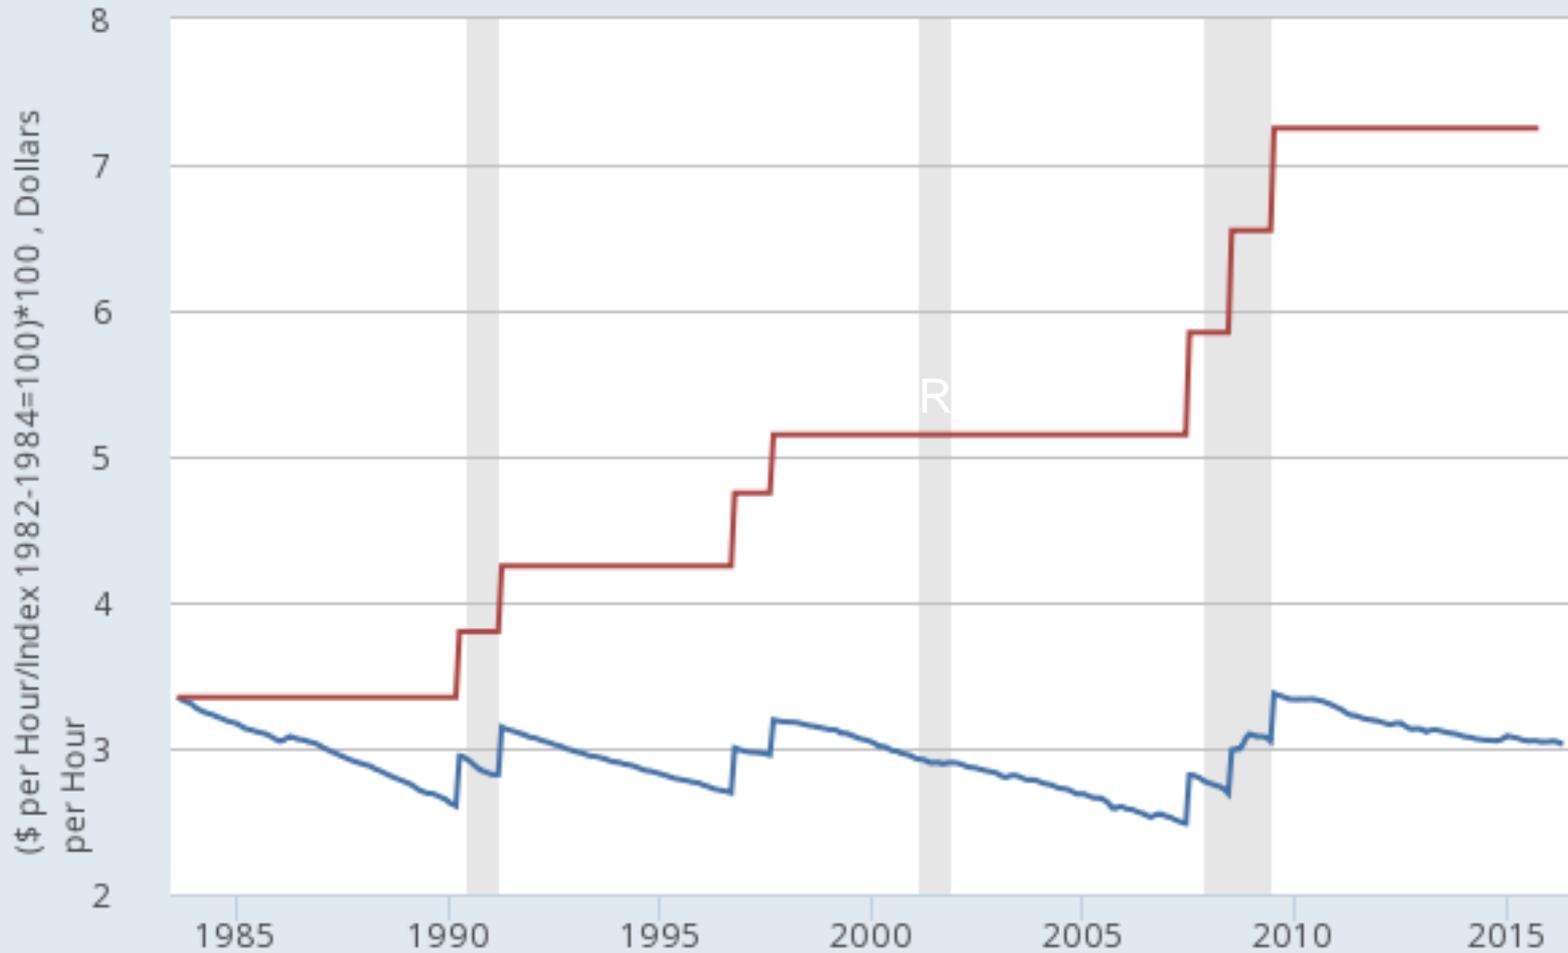

# Setup – FRED Database (I)

- Federal minimum wage
  - Search: Federal Minimum Hourly Wage for Nonfarm Workers for the United States, Dollars per Hour, Not Seasonally Adjusted (FEDMINNFRWG)
  - Add to Graph
  - Modify data range: 1983-08-01 to 2015-10-01

# Setup – FRED Database (I)

- Federal minimum wage (real)
  - ADD LINE: Federal Minimum Hourly Wage for Nonfarm Workers for the United States, Dollars per Hour, Not Seasonally Adjusted (FEDMINNFRWG)
  - Customize data: Add > CPIAUCSL
  - Formula:  $(a/b)*100$

- (Federal Minimum Hourly Wage for Nonfarm Workers for the United States/Consumer Price Index for All Urban Consumers: All Items)\*100
- Federal Minimum Hourly Wage for Nonfarm Workers for the United States

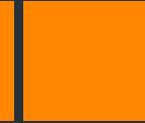

**Objective & Difficulty: INFORMATION LITERACY / Low**

What organization reports the federal minimum hourly wage for nonfarm workers for the United States?

- |          |  |
|----------|--|
| <b>A</b> | FRED (Federal Reserve Economic Database)         |
| <b>B</b> | U.S. Department of Labor                         |
| <b>C</b> | United States Department of Commerce             |
| <b>D</b> | Board of Governors of the Federal Reserve System |

## Objective & Difficulty: INFORMATION LITERACY / Low

What is the highest frequency of reporting the federal minimum hourly wage for nonfarm workers for the United States?

**A** Monthly

**B** Quarterly

**C** Semi-annual

**D** Annual

## Objective & Difficulty: NUMERACY / Low

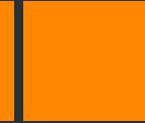

As of July 2009, what is the value of the nominal federal minimum hourly wage for nonfarm workers for the United States?

**A**     \$6.55

**B**     \$3.37

**C**     \$7.25

**D**     100

## Objective & Difficulty: NUMERACY / Low

As of July 2009, what is the value of the real federal minimum hourly wage for nonfarm workers for the United States?

**A**     \$6.55

**B**     \$3.37

**C**     \$7.25

**D**     100

**Objective & Difficulty: ECONOMIC ANALYSIS / Medium**

Between September 1997 and June 2007, the real purchasing power of the federal minimum hourly wage for nonfarm workers for the United States

<b>A</b>	Decreased
<b>B</b>	Remained constant
<b>C</b>	Increased

## Objective & Difficulty: ECONOMIC ANALYSIS / Medium

Between September 1997 and June 2007, the nominal purchasing power of the federal minimum hourly wage for nonfarm workers for the United States

**A**      Decreased

**B**      Remained constant

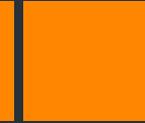

**C**      Increased

**Objective & Difficulty: NUMERACY AND ECONOMIC ANALYSIS / High**

The reason why real minimum wages decrease in value while nominal minimum wages remain constant is that

- |          |                                     |
|----------|-------------------------------------|
| <b>A</b> | The cost of living increases        |
| <b>B</b> | The cost of living remains constant |
| <b>C</b> | The cost of living decreases        |

## Objective & Difficulty: NUMERACY AND ECONOMIC ANALYSIS / High

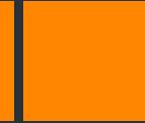

Between July 2008 and December 2008, real minimum wages increased in value while nominal minimum wages remained constant because

- |          |                                      |
|----------|--------------------------------------|
| <b>A</b> | The cost of living increased         |
| <b>B</b> | The cost of living remained constant |
| <b>C</b> | The cost of living decreased         |
